## Mesh load area cover

**£390** From: [northoffroad.co.uk](http://northoffroad.co.uk), 01388 731311

If you carry livestock on your pick-up or simply want to make it more secure, have a look at this mesh load area cover. Having the same profile as standard hood sticks, it can be covered with a ¾ canvas or PVC tilt and

you can leave the back open to allow ventilation without compromising security. The pictured version fits Defender 110 double cab and 88-inch Series truck cabs, but it can be made for any pick-up.

## Low-profile LED bar mounts

**£TBA** From: [4x4overlander.com](http://4x4overlander.com), 01422 243966

Although roof-mounted lights do a fantastic job illuminating the way ahead, they add extra height to your Land Rover – which isn't always welcome.

This LED bar mount fits to the Defender windscreen surround and allows you to keep the bar low – handy if you use multi-storey car parks.

## Four-port breather kit

**£106.80** From: [firstfour.co.uk](http://firstfour.co.uk), 01404 891121

This breather is designed specifically for the TDCI Defender, mounting over the two brackets on the air-conditioning side of the engine bay. The kit

comes with the manifold block (pictured), sintered stainless steel filters, four push-in joiners and 6mm airline to extend the axle and gearbox breathers.

## Defender bumperette corners

**£182.95** From: [trekoverland.com](http://trekoverland.com), 01751 430 693

Available for both 90 and 110 models, these easy-to-fit rear bumperettes should shrug off most bumps and knocks – they're manufactured from

6mm steel, while the box-section construction also adds strength. They're finished in a high-grade powdercoat, so they'll look smart on your Defender.

## Raid Sport crossmember

**£180** From: [replacementchassispartsuk.com](http://replacementchassispartsuk.com), 01926 614484

Rear crossmembers are very prone to corrosion. This Td5 Defender 90 replacement is a straight fit and includes the rear floor supports.

## Corner trim

**£55 (matched pair)** From: [ym-metal-solutions.co.uk](http://ym-metal-solutions.co.uk), 01388 488150

These replacement corners have full-width sides (later ones have shorter folds) and are galvanised to extend their life. The Series versions have standard holes; Defender items come with early (small) or late (large) holes.

## Aluminium Defender grille

**£500 (about £330)** From: [seriesdefender.com](http://seriesdefender.com)

This CNC-machined aluminium grille echoes the front-end look of a Series III Stage 1 V8. It looks terrific in its standard anodised black finish – but you can go the

extra mile by specifying it with a cast aluminium replacement "Land Rover Solihull" badge (\$60 extra) to give your Defender's front end a cool, classic look.

## Aluminium Defender grille

**\$500 (about £330) From:** [seriesdefender.com](http://seriesdefender.com)

This CNC-machined aluminium grille echoes the front-end look of a Series III Stage I V8. It looks terrific in its standard anodised black finish – but you can go the

extra mile by specifying it with a cast aluminium replacement 'Land Rover Solihull' badge (\$60 extra) to give your Defender's front end a cool, classic look.
